OBSERVATION INFORMATION

Species	Date(s) Observed	Spawning	Rearing	Migration	Anadromous
coho	10/9/98		<input checked="" type="checkbox"/>		<input checked="" type="checkbox"/>

IMPORTANT: Provide all supporting documentation that this water body is important for the spawning, rearing or migration of anadromous fish, including: number of fish and life stages observed; sampling methods, sampling duration and area sampled; copies of field notes; etc. Attach a copy of a map showing location of mouth and observed upper extent of each species, as well as any other information such as: specific stream reaches observed as spawning or rearing habitat; locations, types, and heights of any barriers; etc.

Comments: set 2 minnow traps, salmon egg bait 24 hr soak, one below beaver dam 3' high: 3 coho, 5 Dv, one above dam 1 coho, 1 cutthroat, 2 Dv. Stream grassy, flat winding slough, 2-3 ft wide - low gradient. Pond behind dam is 25-30 meters wide, extend back gradually turning to grassy slough

Name of Observer (please print) Peter Branson Ftw Tech III, Dianne Cassidy, Volunteer

Date: 10/10/98 Signature: P. Branson

Address: PO Box 2073
Wrangell, AK 99429

This certifies that in my best professional judgement and belief the above information is evidence that this waterbody should be included in or deleted from the Catalog of Waters Important for Spawning, Rearing or Migration of Anadromous Fishes per AS 16.05.870.
